

Roland FR-1x Sets & User Program Banks by Richard Noel

Web: www.noelaccordion.com

Email: BakersfieldAccordion@gmail.com

I offer a collection of 2 User Sets and one User Program Bank, described below, that are designed to facilitate the playing of a variety of styles on the Roland FR-1x virtual accordion.

To order, just email me at the email address above, and whenever you are ready to make the purchase I will send you an invoice through Paypal. You can pay from your own Paypal account or with a credit card. I will immediately send all of the programming, plus instructions, as email attachments. You only need to download the files and transfer the 1x files to a flash drive for importing to the 1x. Feel free to ask whatever questions you have before and after the purchase.

The price of the programming is \$75. Included in this price is whatever advice you need to install and use the programming. If you eventually sell your 1x, please either restore the unit to factory defaults or let the buyer know that my programming should not be distributed freely.

Please see my web site at www.noelaccordion.com for demonstrations and tutorials for the FR-1x.

These sets and user programs have been created from the ground up rather than transferred from another v-accordion. The 1x speakers and other features are sufficiently different from other v-accordions that the programming needs to be tailored to the 1x, and that is what I have done.

USER SETS. Complete descriptions of the content of each User Set is provided upon purchase, or upon request.

601.ST3 JAZZY Intended for standards and jazz tunes. Includes vibes, twin trumpets, flute, two organ settings, harmonica and jazz scat voices.

602.ST3 COUNTRY/ EUROPEAN Intended for country, cajun, zydeco, German, French, and Italian, it features banjos, mandolin, guitars, Bagpipes, and many other voices for these styles.

USER PROGRAMS

Each of the 8 User Programs is a preset that allows you to quickly and accurately access combinations of sounds drawn from the sets. These are shortcuts to desired sounds, and are created from the user sets.

Bank 703.UP3 allows you to instantly access a 8 different sound combinations from the treble, bass, chord, and percussion sections. I provide these User Programs in part to allow you to better understand and appreciate how they work. You will find the User Programs to be a handy way of organizing your preferred sound combinations and you can easily create your own bank from my User Sets.
