

Roland FR-8x List of Sets & User Programs

Compatible with System 2.0 Update

Web Site: www.noelaccordion.com

Email: BakersfieldAccordion@gmail.com

I offer a collection of 30 User Program Banks, described below, that are designed to facilitate the playing of a variety of styles on the Roland FR-8x virtual accordion. To order, just email me at the email address above, and whenever you are ready to make the purchase I will send you an invoice through Paypal. You can pay from your own Paypal account or with a credit card. I will immediately send all of the programming, plus instructions, as email attachments. You only need to download the files and transfer the 8x files to a flash drive for importing to the 8x. Feel free to ask whatever questions you have before and after the purchase.

The price of the programming is \$150. Included in this price is whatever advice you need to install and use the programming. If you eventually sell your 8x, please either restore the unit to factory defaults or let the buyer know that my programming should not be distributed freely.

Please see my web site at www.noelaccordion.com for demonstrations and tutorials for the FR-8x.

IMPORTANT! You should have the most recent system installed. You definitely need system 2.0 or above for this programming. I also use the Alpine & AccOrchestra expansions for many sets and registers. Please let me know if you do not have these.

USER PROGRAM BANKS. User Programs are presets that allow you to select a combination of treble, bass, chord, and percussion sections with one push of a treble register. Each bank has 14 different User Program presets. Within each bank you will be able to instantly select a preset with instrumentation and percussion that is appropriate for that style of music. Certain voices are in the same place across different sets in order to make it easier to select sounds when playing in different banks.

Style Banks: Accordion1, Accordion+, Strings, Patriotic, Dixie, Country, Blues, Foxtrot, Jazz, Soft Ballads, Waltz1, Waltz2, Latin 1, Latin2, Italian, French, German, Irish, Mexican+Alpert, Rock, World, Classical, Soft Brush, Christmas. Each of these banks consist of 14 user program presets, all organized for easy retrieval when performing.

SONG-SPECIFIC BANKS. A group of banks are also devoted to specific songs, such as Malaguena, In the Mood, Phantom of the Opera, and others. These banks are primarily for those specific songs rather than for general styles of music. Most owners will probably spend most of their playing within the Style Banks, but the song-specific banks will be useful for specialized purposes.

A complete description of the content of each User Program will be sent to purchasers of the User Programs, or upon request.

I provide whatever assistance you need to make the programs work, along with tutorials and demonstrations that can be viewed from the links provided at my website, www.noelaccordion.com.
